Vitor Dino

Front-End Software Engineer

Software engineer focused on user experience and human-computer interaction.
Over a decade helping companies and products to build, ship, delight and convert.

Work Experience

Riot Games — Santa Monica, US / Remote
Senior Software Engineer | 03/2021 – present

Hired as a contractor on their biggest player-facing product with hundreds of millions monthly active users, to ship their most ambitious project to date. Created a culture of meaningfully writing unit tests, adopting open source libraries and best practices. After shipping this first project, started broadening to other areas of the product: from systems programming and web-services written in C++ to interviewing and onboarding new engineers.

14islands — Stockholm, Sweden / Remote
Creative Developer | 07/2019 – 03/2021

Worked on their most complex web application project and some marketing websites and helped establish their Brazilian office. Guided the adoption of React.js and other modern web development practices.

significa — Porto, Portugal / Remote
Front-End Developer | 02/2019 – 08/2019

Hired as a front-end developer, focused on React.js development from multi-tenant web applications to marketing websites.

startaê — Brasília, Brazil / Remote
Senior Front-End Engineer | 03/2018 – 03/2019

Provided frontend and ui design consultancy for Brazilian and American startups. Lead the adoption of React.js to prospect bigger US-based clients and helped the team ramp up their skill level on it.

kunst — Brasília, Brazil
Designer, Front-End Developer | 01/2011 – 02/2018

Founded a small design + web development studio. Clients ranged from local businesses and startups to federal government agencies.
